Comments	<p>On the left bank of Ravine Loret, about 30 meters above its bed. Entrance 3 x 2.5 metres gives way to a room of 50 x 25 x 11 meters. At its extreme NE a pit 2 meters in diameter and 3 meters deep access to a gallery of 18 x 3 x 3 meters. At its extreme W, through some blocks will amount to some superior rooms with abundant blocks (Maximum positive gap: +22 meters). GENESIS: Former sink with abundant processes clásticos and reconstructive post. Limestones of Muschelkalk. This cavity, in prehistoric times had multiple uses: served as a refuge and was used as a burial place during the Neolithic period. Cavity late neolithic burial but it was a good hiding place during the Bronze.</p>
